Pin Adjustment Tool Instruction CY2/CB2/CB3

1. Assemble the pin adjustment tool (1) on top of the cylinder (CY2) or CylinderBlock (CB2 or CB3) (2) by placing the pin adjustment tool on the piston. Fasten the two screws (3) into the cylinder lid. Adjust the nut when the adjustment tool and screws are in position to lock the tool.
2. Insert the screwdriver (4) into the assembly tool to the pin adjustment screw (5).
3. Adjust the valve pin with the screwdriver.
